# AWAKENINGS FOR WOMEN

## WHY NOT THE BEST?

At Awakenings we place a great deal of emphasis on the living environment of our clients. Awakenings for Women has become the premier recovery community in the nation, with a success rate that is far above the national average. Awakenings is not treatment, though many of our clients avail themselves of our Aftercare and Thinking for a Change programs. Awakenings is a Women's sober living community where clients learn to live life on life's terms—develop life-skills, find a job, and re-learn how to live a happy, healthy, sober life.

## REAL WORLD LIVING IN A SUPPORTIVE ATMOSPHERE

At Awakenings, it is not unusual to hear clients speak of the tremendous support they receive from staff and other clients who provide a sustaining environment that reinforces recovery. The staff coaches the life-skills and adult behaviors that are often lost in addiction, and they are constantly available to answer questions and help solve problems.

*When I came to Awakenings, I was a scared little girl. They gave me the tools to become the strong, sober, successful woman I am today.*

*—Tiffany P.*

## FREEDOM FROM ADDICTION FREEDOM TO CHANGE

With continued involvement in local 12-Step communities, our clients learn the value of building a strong sober support system. This does not happen overnight, which is why many of our clients stay for six months or longer. For long-term sober living, Awakenings is recommended by treatment centers all over the country.
